Autobiography

My name is Grant Perrine. I am a Sophomore in high school. I look forward to learning more about accounting and business in this class. I hope to someday use what I learn in the work field. In this autobiography I will be talking about my background, how I do in school, how I am as an individual, and I will talk about what I hope to be doing in the future.

I was born in Kalamazoo, MI. I grew up in Adrian Michigan, and later moved to Schoolcraft at the age of 5. I still live there to this day, however I do school of choice so I am able to go to Portage Northern. I really enjoy going to this school. The soccer program is terrific, the teachers are great, and the courses that are given are a real step up from a small school like Schoolcraft.

I have a brother and a sister, both older. My parents are awesome, they help through everything. Fortunately, I am the only kid living at home still. My parents have been a good role model throughout my life. They make me want to strive for success. Whether it be soccer or academic achievements, they support me.

I am one of those students who has gotten away with not studying and getting A's. Unfortunately, I realize that habit will soon have to change. I have always been

good at math even though it is not my favorite subject. I am also involved in school activities for the school. I play varsity soccer for school, and I run track. I play club soccer for Alliance ASC Pro 18. WE are based out of Grand Rapids so I have to travel there for practice. It gets boring but the level of soccer makes it worth it. Last year we went to Las Vegas and played against the number one team in the nation. We only lost 1-0.

I do not have a job yet, but I'm sure in order to pay my car off I will have to get one soon. I am not sure where I want to work but I feel that I will end up working at either fast food or a store for my first job just to gain experience.

My weakness as an individual is dealing with those people that do not try or care. I take every job I do and do the best job that I can do, and when someone does the same job but worse I just do not like it. My biggest accomplishment is playing in the national league for soccer. I played against the best teams in the country and it was a great experience.

In the future I plan to work for a sales company so I can afford to give my kids the life I had as a child. They deserve to have the chances and opportunities I was given.

In conclusion, my life has faced ups and also its downs, but I look forward to the challenges I have to face in order to become the person that I must become. I will become the person I am through all the mistakes and also achievements given to me throughout my life.
